SMART INDIA HACKATHON • SIH26092

SAMARTH BUSINESS

Official Team Work Distribution & Code Reference Manual

Presentation Order: 1. Piyush (Architecture) → 2. Rupesh (Fund Planner & DPR) → 3. Vaishnavi (Schemes) → 4. Sakshi (AI & Khata)

> **Core Goal:** Har team member ko unke assigned module ka clear technical flow aur codebase location samajhana, taaki presentation mein har koi bina notes ke confidently explain kar sake aur evaluators ke technical sawalon ka sahi jawab de sake.

1 PIYUSH

Overall Website & Frontend / System Architecture

LEVEL: HARDEST

> **Main Responsibility:** Project introduction, smart session routing, manual credentials auth (`piyush123` / `1234567`), enterprise profile engine, multi-page navbar integration, and live deployment.

</> Codebase Locations & Files

index.html

Lines 8-16

Smart Session Router: Checks `localStorage.getItem("samarth_user_session")`. Agar session active hai toh `dashboard.html` bhejna, warna `login.html` par redirect karna.

login.html

Lines 158-163 & 287-330

Manual Authentication Engine: Authorized ID `piyush123` aur Password `1234567` verification logic. Form submit hone par shake animation, error feedback aur `localStorage.setItem("samarth_user_session", ...)` trigger hota hai.

dashboard.html

Lines 24-56 & 740-762

Central Enterprise Hub: Multi-page unified navigation header connecting `schemes.html`, `profile.html`, and `expenses.html`. Bottom script handles session check & logout handler.

profile.html

Lines 90-220

Enterprise Profile Engine: Promoter parameters form, live MSME Readiness Scorecard calculations, and demographic scheme recommendations.

script.js

Lines 98-191

Global Utilities & Profile Sync: `formatINR()` currency formatter, `showToast()` notification engine, and two-way sync between saved profile savings and fund planner.

Possible Judge Question: "Website ka data kahan store hota hai?"

Answer: Current prototype browser ke `localStorage` me client-side session store karta hai taaki bina server setup ke instant chal sake. Production roadmap mein ise cloud PostgreSQL/MongoDB aur secure JWT authentication se replace kiya jayega.

---

2 RUPESH

Fund Planner, Capital Allocation & Simplified Bank DPR

LEVEL: MEDIUM-HIGH

> **Main Responsibility:** Capital inputs (Bank Loan + Personal Equity), 9 Dynamic Industry Trade Models, 100% allocation rebalancing, custom expense modal, and 1-Click print-ready Bank DPR export.

</> Codebase Locations & Files

expenses.html

Lines 90-212, 268-313 & 316-438

Capital Allocation Studio: Loan and Savings range sliders, auto-balance badge indicator, custom expense add/edit modal (`#expense-modal-overlay`), and the official 1-page Bank DPR modal (`#dpr-modal-overlay`).

script.js

Lines 261-371

`tradeModels` **Presets:** Pre-calibrated industry models: Retail Kirana/Grocery, Food/Cloud Kitchen, Manufacturing, Garments, Bakery, Pharmacy, Electronics, and Salon.

script.js

Lines 389-496

Allocation Math & Actions: `normalizeAllocations()` strictly scales sum to 100%, `addExpenseItem()` , `removeExpenseItem()` , `stepExpensePercentage()` , and `autoBalanceAllocations()` .

script.js

Lines 511-624

`updateFundPlanner()` : Main calculation engine.

```
Total Available Capital = Loan Amount + Own Savings
Category Allocation Amount = Total Capital × Allocation Percentage
```

script.js

Lines 1118-1240

`generateBankDPR()` : Fills promoter profile, financial summary, Debt-to-Equity Ratio (DER = Loan / Savings), populates `#dpr-allocation-tbody` , and enables `window.print()` for Bank PDF export.

Possible Judge Question: "DPR kya hota hai aur Debt-to-Equity ratio kya batata hai?"

Answer: DPR (Detailed Project Report) bank loan approval ke liye project ki financial feasibility file hai. Debt-to-Equity ratio yeh batata hai ki promoter ke ₹1 ke mukable bank ka kitna loan laga hai. MSME norms ke anusar 2:1 se 3:1 ideal maana jata hai.

3 VAISHNAVI

Government Schemes Portal & Subsidy Calculator

LEVEL: MEDIUM

> **Main Responsibility:** Curated Central & State MSME schemes master dataset, live keyword search, category filter pills, interactive Government Subsidy Calculator, and detailed scheme guidelines.

</> Codebase Locations & Files

script.js

Lines 6-91

`schemesData` **Dataset:** 6 flagship schemes with max loan, subsidy rules, and official links:

1. **PMEGP** (MSME) — Up to ₹50L (Mfg) / ₹20L (Service), 15%–35% Subsidy
2. **PMMY Mudra** (DFS) — Shishu (₹50k), Kishore (₹5L), Tarun (₹10L)
3. **PM SVANidhi** (MoHUA) — ₹10k–₹50k with 7% interest subsidy
4. **Stand-Up India** (SIDBI) — ₹10L–₹1Cr for SC/ST and Women
5. **PM Vishwakarma** (MSME) — ₹15,000 toolkit + ₹3L at 5% rate
6. **CGTMSE** (MSME/SIDBI) — Up to ₹5 Crore collateral-free credit cover

schemes.html

Lines 70-165 & 210-305

Schemes Portal & Subsidy Calculator:

- Real-time search: `#scheme-search-input` filters titles, ministries, and benefits.
- `updateSubsidyCalc()` : Computes PMEGP subsidy:

```
General Category: Urban 15% / Rural 25% (Own contribution: 10%)
Special Category (Women, SC/ST, OBC): Urban 25% / Rural 35% (Own
contribution: 5%)
```

scheme-detail.html

Lines 44-72 & 160-210

Scheme Detailed View: URL parameter reader (`?id=1`) dynamically loads eligibility criteria, checklist of documents, and direct links to official government application portals.

Possible Judge Question: "Kya yeh website direct loan approve karwati hai?"

Answer: Nahi, platform entrepreneurs ko scheme linkage, eligibility guidance aur bank-ready DPR report taiyar karke deta hai. Final sanctioning bank branch aur official government portal (jaise Udyamimitra ya KVIC) se hoti hai.

4 SAKSHI

Samarth AI Co-Pilot & Digital Khata (Business Ledger)

LEVEL: EASIEST & MOST INTERACTIVE

> **Main Responsibility:** Bilingual (Hinglish + English) AI advisor demo, natural language expense modification, Digital Khata transaction entries, and Net Profit/Loss calculations.

</> Codebase Locations & Files

dashboard.html

Lines 374-490

Chatbot & Khata UI:

- Language switcher pills: `#lang-btn-hinglish` and `#lang-btn-en`.
- Suggestion chips with instant Hinglish prompts.
- Digital Khata ledger cards: Sales (`#stat-sales-val`), Purchases (`#stat-purchases-val`), Overheads (`#stat-expenses-val`), and Net Profit (`#stat-profit-val`).

script.js

Lines 718-735 & 738-970

Hinglish Detection & Expense Commands:

- `detectHinglish()` recognizes Hindi keywords (*kya, kaise, dukan, kharcha, badhao, etc.*).
- `handleAiExpenseCommand()`: Understands user commands like *"Delivery bike add karo ₹40,000"* or *"Stock 40% karo"* and auto-balances the budget.

script.js

Lines 1243-1340 & 1342-1428

Bilingual Knowledge Base: `smartResponsesHinglish` and `smartResponsesEnglish` covering Mudra loans, PMEGP subsidies, FMCG/garment retail margins, bank DPR, and Stand-Up India.

script.js

Lines 1430-1485

Digital Khata Engine:

```
Net Profit = Total Sales - (Inventory Purchases + Operating Expenses)
```

`refreshKpis()` dynamically colors Net Profit Green (`#059669`) on profit or Red (`#e11d48`) on loss.

Possible Judge Question: "Net profit aur Sales mein kya antar hai?"

Answer: Sales dukaan ki kul bikri (total revenue) hoti hai. Net Profit woh bachi hui kamai hai jo maal khareedne ki lagat aur dukaan ke kharche (rent, bijli, staff wages) nikaalne ke baad bachti hai.

⏱️ Team Presentation Plan & Time Allocation

Order	Member	Assigned Module	Key Screen / Demo Action	Time
1	**Piyush**	Problem Statement, Architecture & Login	`login.html` (ID: piyush123) ➔ `dashboard.html` ➔ `profile.html`	**90 sec**
2	**Rupesh**	Fund Planner, Sliders & Bank DPR	`expenses.html` sliders ➔ Trade Chips ➔ 1-Click Bank DPR Modal	**75 sec**
3	**Vaishnavi**	Govt Schemes & Subsidy Calculator	`schemes.html` search ➔ Subsidy Calc ➔ `scheme-detail.html`	**60 sec**
4	**Sakshi**	Bilingual AI Advisor & Digital Khata	Hinglish Chat prompt ➔ Add ₹10k sale in Khata ➔ Net Profit update	**60 sec**
All	**Full Team**	Future Scope & Jury Q&A	Answering questions regarding database, backend API & cloud deployment	**60 sec**

💡 Golden Rules Before the Jury:

- Har member apna assigned module bina notes dekhe confidently demo kare.
- Agar koi feature abhi client-side hai (jaise localStorage ya simulated AI), toh use chupayein nahi — use honest rehkar *"Current working prototype"* batayein aur *"Future backend architecture"* ka vision share karein.
- DPR ko kabhi guaranteed bank approval na bole — ise *"Official Bank Appraisal Draft"* bole.
